The development of information technology and artificial intelligence has brought about ground-breaking changes in the global industry sectors. The transformation of economic models accelerates electronic business activities which has yielded a robust demand for professionals in the related fields. Also, AI has become a key technology for the global digital economy of the future. MPU's will stride in with its solid foundation in the field hand in hand with its established R&D including the Engineering Research Centre of Applied Technology on Machine Translation and Artificial Intelligence, Ministry of Education, and the Centre for Artificial Intelligence Driven Drug Discovery.

Furthermore, MPU offers the first programme in computer education specialisation as well as the only gaming technology specialisation programme at undergraduate level in Macao. The Computing Programme has successfully achieved higher education academic accreditation granted by the Institution of Engineering and Technology (IET). Qualified graduates of the Programme partially fulfil the Chartered Engineer (CEng) educational requirement internationally, which will help them seek employment all over the world.

We have set up several research centres at our University through collaborations with numerous universities and major players in the industry. Students who are interested to pursue careers in the related fields could conduct research overseas and can finish their studies at prestigious universities by credit transfer. Our IT programmes provide the best learning environment for our students who can gain very solid knowledge necessary to begin their careers.

澳門理工大學開辦公共行政及社會工作課程培育優秀人才服務社會。多年來，我們為公共行政機構、非營利組織及社福機構培養了眾多高素質的服務型管理人才。今天，有相當一部分校友已成為各個機構的骨幹領導成員，薪火相傳，為學弟妹提供實習及工作機會。學生通過研習最新的議題及個案，循序漸進地吸收基礎理論知識，進而深入認識有關機構的運作模式、組織制度及文化，成為具備倫理操守及價值觀以及較高能力與素質的公共管理或社會服務者。

To nurture local talents, our public administration and social work programmes have been offered for more than two decades. Over the years, we have cultivated many high-calibre graduates, many of whom now assume leadership positions at public, non-profit and social welfare organisations. Plenty of internship and employment opportunities are available. Through investigating and debating the latest issues and case studies, students will become familiarised with the theoretical foundations of their disciplines before moving on to learn about the operations, structures and cultures of various service organisations. Graduates will become competent professionals with strong commitments to their professional values and code of ethics.
